ATTENTION word warns of possible minor injuries or damage

Safety Warnings

Purpose of use

The lamp is designed for home use.
Not suitable for commercial purposes

The lamp is designed for dry indoor areas.

Danger for children

Keep children away from small parts to avoid possible choking hazards. !

Dangers that electricity may cause;
The electrical connection of the lamp must be made by a qualified electrician.
Additionally, local regulations regarding electrical installation should be observed..

- The lamp should not be placed on conductive ground.
- The lamp must not be used in enclosed areas where there is a risk of explosion.
- The lamp should not come into contact with any liquid.

-Clean only the outer surface of the lamp with a dry cloth.

-Before connecting the lamp, make sure the fuse is off.!

-Make sure there are no pipes or other electrical lines where you will be drilling a hole in the ceiling.

-If there is any damage to the lamp wiring, do not connect the lamp.

-The lamp may only be connected to locations that comply with its technical data.

-Do not make any changes to the lamp or the connection cable. Have any repairs made by an authorized service only. Do not change the connection cable yourself.

Fire/Explosion Warning

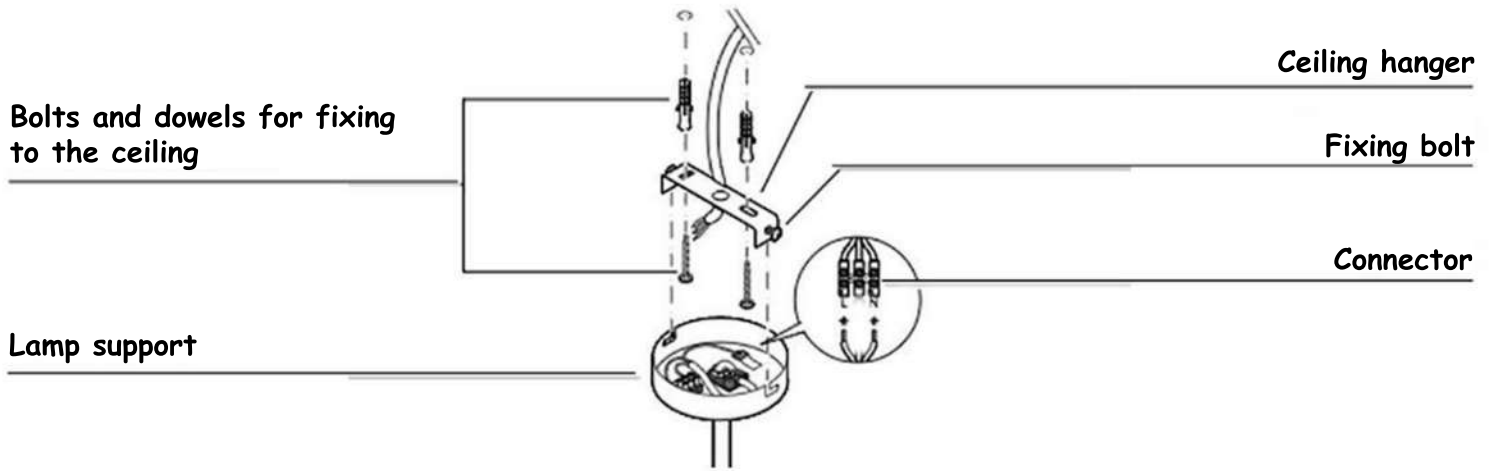

It may get hot during use. Do not touch the lamp. Do not cover the lamp and never hang anything on the lamp.

The mounting material supplied with the product is suitable for standard ceilings and walls. Before mounting, ask the store for the mounting material that is suitable for your ceiling or wall and change it if necessary..

Harsh chemicals should not be used for cleaning.

ATTENTION
There is a risk of material damage

Overview - The Lamb

Assembly

UNPACK

Danger for children

- Risk of death from choking/swallowing
- Keep children away from packaging material. Destroy packaging immediately. Keep small parts (e.g. screws) out of reach of children.

1. Remove all packaging material. Be careful not to accidentally throw away the assembly materials.

2. Check the lamp for damage and that all parts are present.

Mark the drilling locations and install the ceiling hanger.

You can use the ceiling hanger as a template to mark the holes on the ceiling. Proceed as follows;

Loosen the two fixing bolts located on the sides of the ceiling hanger so that you can remove the ceiling hanger.

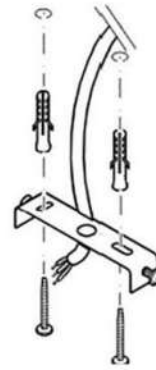

DANGER-Danger of death from electric shock.

- Before making the electrical connection, the fuse must be turned off or the electrical line must be left without voltage.
- Make sure that there are no pipes or electrical lines passing through the place where you will be drilling.!

DİKKAT- There is a risk of material damage

- The mounting material supplied with the product is suitable for standard ceilings and walls. Before mounting, ask the store for the mounting material that is suitable for your ceiling or wall and change it if necessary.

2.

Hold the ceiling hanger where you want to mount the chandelier and mark the screw holes. Drill holes for the wall plugs. Fix the ceiling suspension with 2 dowels and bolts.

Electrical connection-For expert technicians only

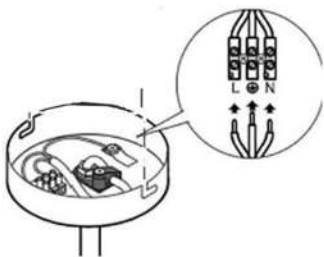

DANGER - Danger of death from electric shock.

-The electrical connection of the lamp must be made by a qualified electrician.

Before making the electrical connection, the fuse must be turned off or the electrical line must be left without voltage.

3.

Have the electrical line connection done by a specialist technician.
Slide the lamp holder onto the fixing screw.
Turn the lamp holder clockwise until it stops.

Turn on the lamp

DANGER
-Danger of death from electric shock.

Only after completing all the installation steps turn on the fuse and restore voltage to the power line.

Cleaning

1. Turn off the lamp and wait for all hot parts to cool sufficiently.
2. Clean all parts of the lamp with a dry, soft cloth.

Destruction

The product and its packaging are made from recyclable materials.

Dispose of packaging according to its material type. For this, you can benefit from the opportunities offered by paper, cardboard and light packaging collection centers in your area.

Devices marked with this symbol must not be disposed of with household waste.

According to the law, you must dispose of your waste devices separately from your household waste. You can contact your municipality for information about collection centers that take back waste devices free of charge.

Technical Information

Mains voltage: 220-240 V AC- 50-90 Hz
